

BURY

PLANT HIRE

3t Volvo excavator EC25 digger

£POA

The very compact dimensions of this machine enable it to be worked safely on the narrowest of sites. The bucket forces and digging depth are amongst the best on the market for improved productivity whilst the long track length provides exceptional stability. The hydraulic offset of the boom makes it possible to work alongside a wall. Power assisted controls enable the most delicate work to be done quickly and precisely. Excavator can be hired with driver if required.
